

Q072 First Article Inspection (By Seller Only) - rev 12/10/02

Seller shall perform a First Article Inspection (FAI) per requirements of specification SAE AS9102 at first production run and shall perform a comparable inspection at production change points or for specified articles following inspection tooling changes, design changes, or evident Quality degradation. This includes all details and sub-assemblies, which constitute the end item ordered.

When documenting the FAI, the Seller may use the forms contained within the SAE AS9102 specification or their equivalent, so long as the forms contain all the information required by SAE AS9102.

Seller will include results of FAI with shipment of deliverable product to Buyer.
