STATIC-DISSIPATIVE PACKAGING - NON-ESD SENSITIVE GOODS

Goods procured under this contract, although not considered Electrostatic Discharge (ESD) sensitive, will be associated with ESD sensitive goods in stocking and manufacturing processes and therefore shall be packaged in static-dissipative materials.

Seller shall ensure:

- Each item is packaged in static-dissipative material. Items such as contacts, terminals, sleeves, junctions, etc., can be packaged collectively or as required by drawing.
- Each package is heat sealed. Packages shall be free from non-conductive or static generating wrapping or cushioning material.
- Static-dissipative package materials meet the requirements of MIL-PRF-81705, Type II, Class 1, 6 mil thickness as a minimum.

Note: Packaging personnel for these goods need not be ESD certified.
