

Q802 The Boeing Company Source Inspection - rev 3/6/01

Source Inspection by The Boeing Company is required on this Purchase Order/Contract prior to invoiced product shipment to The Boeing Company. Evidence of The Boeing Company Source Inspection must be indicated, by a Boeing Company's Quality Engineering Representative's signature or stamp, on the contractor's shipping document accompanying each shipment. (Reference The Boeing Company Special Quality Assurance Clause No. 877). Final inspection or acceptance testing of goods or services at the contractor's facility must be witnessed by The Boeing Company's Quality Engineering Representative. Final acceptance of contracted goods or services will be accomplished after all acceptance testing and final inspections have been witnessed and all other Purchase Order/Contract requirements have been satisfied fully by the contractor. The contractor shall notify The Boeing Company's Quality Engineering at least five (5) working days in advance of the date that contracted goods or services will be ready for testing or inspections. For contracts performed on Kennedy Space Center or Cape Canaveral Air Station, final acceptance shall be accomplished after The Boeing Company's Quality Engineering has witnessed all required inspections, tests, and all Purchase Order/Contract requirements have been fully satisfied by the contractor.
