

E223 - Supplemental Special Tooling and Special Test Equipment Requirements

Seller shall maintain a special tooling management process that complies with the applicable requirements found in document D950-11059-1, titled “Special Tooling and Special Test Equipment Quality Standard”, incorporated herein and made a part hereof by reference. Buyer reserves the right to conduct surveillance at Seller's facility to determine whether Seller's special tooling management process meets the requirements of this clause.

In conjunction with D950-11059-1, the Seller shall also comply with applicable requirements of D33207-1, “Supplier Statement of Work for Special Tooling and Special Test Equipment”, unless this Contract incorporates a specified tool statement of work. D33207-1 includes Seller’s requirements for all newly funded line items, modifications, or repairs, which includes special tooling and special test equipment. A copy of the D33207-1 can be located in the Product Standards Data System (PSDS). Please contact Buyer’s Authorized Procurement Representative if Seller does not have access to PSDS.

Seller shall contact Buyer’s authorized technical group for technical support, guidance, or to submit all applicable data item deliverables defined in D33207-1 (e.g. engineering definition reviews/data, acceptance records, periodic inspection plan/results).

A copy of D950-11059-1 and the contact information for the applicable contracting sites Buyer’s authorized technical group can be obtained at the following URL address:
