C-17 ENGINE (F117) PROPULSION SYSTEM ROTABLE COMPONENTS/PARTS

Seller shall provide an identical digital copy of all included paperwork to the buyer via electronic transmission to m117certdocuments@boeing.com upon part ship.

All manual references that include an engine model must indicate PW F117, not PW2000.

If deviation from manual or drawing (e.g., PMA (Part Manufacturer Approval), DER (Designated Engineering Representative)) is required, contact Boeing Engineering via buyer's agent IAW SREDI process and J202. (also Ref Q219K)

Multiple rotable components/parts being delivered in one shipment require individual packaging and paperwork.

Each part shall include at least one of the three following serviceability/condition documents affixed to the part.

1) 8130-3 – In addition to requirements flowed by clause Q063, If part is manufactured or repaired in accordance with Federal Aviation Administration (FAA) Code of Federal Regulations (CFR), seller shall include a completed and signed 8130-3 form. Specific requirements:
   a. Block 11
      1. "RETOK" Retest OK
      2. "New"
      3. "Repaired"
      4. "Overhauled"
   b. Block 12
      1. Include Description of Repairs
      2. Include Manuel Reference (tech data used)
      3. If Block 11 is "Overhauled" -- block 12 'Remarks' is to have --- Time Since Overhaul = zero (TSOH=0)

2) DD1574-1 (Requires Signature/Stamp/Date (ID Tags Not Sufficient))
   a. In REMARKS - Contain one of the following part condition descriptors, reflective of the scope of work performed, statement of repairs performed and manual reference (tech data used):
      - "RETOK" Retest OK
      - "New"
      - "Repaired"
      - "Overhauled" (Remarks is to have --- Time Since Overhaul = zero (TSOH=0))

3) Certificate of Conformance (title required) – IAW Q090 and includes condition (New/Repaired/Overhauled) and Signature/Stamp/Date
   a. Physically state “Certificate of Conformance” either on the form or above the COC statement
   b. Contain one of the following part condition descriptors, reflective of the scope of work performed:
      - “RETOK” Retest OK
      - “New”
      - “Repaired”
      - “Overhauled” (Remarks is to have --- Time Since Overhaul = zero (TSOH=0))

      For Certificate of Conformance, in addition to above:

      Note- reference (FAR 52.246-15)
      • Seller’s name and address and reference to Buyer’s contract number and line item number. (Seller’s C of C)
      • Manufacturer’s (or service provider’s) name and address. (Manufacturer’s (or service provider’s) C of C)
      • Signature or stamp with title of Seller’s authorized personnel signing the certificate, date of signing, and a statement attesting that Goods provided under this contract conform to all contract requirements. Certificates utilizing secured computer-generated signatures with title of Seller’s authorized personnel are acceptable.
      • Part number and dash number (as specified by Purchase Contract (PC)) for each item.
      • Statement of repairs performed.
      • Tech Data used, Revision level / version to which the Goods were manufactured (or serviced)
      • Traceability information, if required, representative of each item - to include the lot trace (e.g., date, batch, heat) or the individual item trace (e.g., serial number)
      • When multiple item manufacturers (or service providers) and/or multiple lots are included in one shipment, Seller shall separate and identify respective manufacturer’s (or service provider’s) lots, and indicate each lot quantity
      • If goods are Buyer furnished, so indicate on C of C by part number and quantity
      • Additional documentation requirements defined by the item specification as applicable
