Introduction

Year 2000 Requirements and Standard's Versions

Due to Y2K (Year 2000) efforts, we have upgraded our EDI formats to be in compliance with Y2K date formatting.

The current versions of the standards we use are:

- ANSI ASC X12 - version 4010
-

EDI Standards and Transaction Sets

The following are the required ANSI ASC X12 transaction sets' message sets' standards:

- ANSI ASC X12:
 - 850 - Purchase Order
 - 855 - Purchase Order Acknowledgment
 - 860 - Purchase Order Change
 - 865 - Purchase Order Change Acknowledgment
 - 997 - Functional Acknowledgment

Purchase Order and Purchase Order Change and Acknowledgements

- The ANSI ASC X12 **850** transaction set message requires the 855 to be returned within 10 days of issue of the original Purchase Order.
 - The ANSI ASC X12 **860** transaction set message requires the 865 to be returned within 10 days of issue of the Purchase order change.
 - The ANSI ASC X12 997 transaction set message is required to be returned with 48 hours of the 850/860 being sent out.
-

EDI Integration Test

Purpose

This section defines Boeing Commercial Airplane Group, Materiel Division, EDI test requirements for all inbound and outbound EDI transactions.

The purpose of the integration testing is to confirm that the trading partner can successfully:

1. Acknowledge an EDI transmission;
2. Translate between the ANSI ASC X12 format and native application files, i.e. confirm the application data is mapped correctly.

Although the following is not a direct part of the testing process, it is equally important DURING TESTING for the trading partner to confirm their internal business process(es) is receiving the data they require, and can interpret the data and understand what data is being sent.

Test and Production Environment Considerations

Overview

- Testing is required for each trading partner before they can be moved into a production environment.
- Testing will be scheduled to last one month.
 - An Index of Tests is provided to document the disposition of the test. A description of the required functionality and test (pass/fail) criteria is included.

Common Testing Issues:

ISA

- ISA level indicator during testing will reflect “T” (for test) during the testing phase
- The ISA level indicator for production must be revised to “P” (for production) at the time when production data is sent to the trading partner.

GS

- GS functional group level (GS02) will reflect “PCOSTEST” during the **testing** phase
- The GS02 element will be revised to “PCOS” when **production** data is sent to the trading partner.

VAN and Interchange ID

- The VANs we use are AT&T and GEIS. Which VAN we use is dependent on who your VAN is.

	TEST environment:	PRODUCTION environment:
AT&T	Our Qualifier is 01, Interchange Id is 009256819	Our Qualifier is 01, Interchange Id is 627786767
GEIS	Our Qualifier is 12, Interchange Id is 4252376148	Our Qualifier is 12, Interchange Id is 4252660502

EDI Integration Test - continued

Integrated Functional Test Steps

The trading partner will receive test purchase orders generated from the Purchase Control On-Line System via EDI.

Part A - Acknowledgment & Data Translation

- The trading partner is required to send a 997 transaction) acknowledging each test purchase order to Commercial Airplanes.
- The trading partner is required to send a 855 or 865 acknowledging for each test purchase order or purchase order change to Commercial Airplanes.
- The trading partner is required to translate the test data using the trading partner's chosen standard (ANSI ASC X12) and the applicable overlay formats.

Part B - Parallel Mode & Data Verification

- The trading partner receives production purchase orders via EDI in a parallel mode (i.e., purchase orders will be sent via EDI and paper).
- The trading partner compares the translated data, native data and actual hard copy (paper copy) of the end document to ensure accuracy and completeness.

Upon successful completion of the integrated functional test, the trading partner will be migrated into a production mode, that is, paper will no longer be sent.

Index of Tests Form

The trading partner will not be required to return the completed Index of Tests but is advised to complete the log for their records.

Performance of this test confirms the adherence to ANSI ASC X12 or UN/EDIFACT EDI standards.

PART	Date Passed	Date Failed	Supplier Initials
A

EDI Integration Test - continued

Integrated Functional Test Part A

Terminology	<ul style="list-style-type: none"> • Originator will mean Commercial Airplanes • Recipient will mean the trading partner • Native data - the data prior to being processed by the recipient's translator. • Translated data - the data processed by the recipient's translator.
Required Functionality - ANSI ASC X12	<p>The originator sends test transmissions to the recipient.</p> <p><u>850 Transaction Set</u></p> <ol style="list-style-type: none"> 1. When the recipient receives the 850 transaction set(s), the recipient sends the originator the 997 Functional Acknowledgment transaction set(s) as well as the 855 Purchase Order Acknowledgment. 2. a. The trading partner translates from ANSI ASC X12 format. b. The trading partner compares the native data with the translated data. <p><u>860 Transaction Set</u></p> <ol style="list-style-type: none"> 1. When the recipient receives the 860 transaction set(s), the recipient sends the originator the 997 Functional Acknowledgment transaction set(s) as well as the 865 Purchase Order Change Acknowledgment. 2. a. The trading partner translates from ANSI ASC X12 format. b. The trading partner compares the native data with the translated data.
Test Criteria	<p>PASS: The recipient sends a Functional Acknowledgment (997) and a Purchase Order Acknowledgment (855) or a Purchase Order Change Acknowledgment (865) and it is received by the originator without errors.</p> <p>FAIL: A 997 or 855 or 865 is not successfully received by the originator..</p>

Integrated Functional Test Part B

Required Functionality	<p>The originator (Commercial Airplanes) sends production purchase orders via EDI in a parallel mode (i.e., production purchase orders will be sent via EDI and paper). <u>This parallel mode of operation should not last more than one month.</u></p> <ul style="list-style-type: none"> • The trading partner compares the translated data, native data and actual hard copy (paper copy) of the end document.
Test Criteria	<p>PASS: Each viewed document correctly matches.</p> <p>FAIL: The presence of any discrepancies or translation errors between viewed documents exists.</p>

ANSI ASC X12 - 850 Transaction Set Mapping

Introduction

This section displays the mapping requirements for the ANSI ASC X12, version 4010, 850 transaction set.

Boeing Commercial Airplanes Group is a member of the Aerospace Industry Association's (AIA) Electronic Commerce Working Group (ECWG). The AIA ECWG's purpose is to review the ANSI ASC X12 transaction sets used within the aerospace industry and harmonize them. To harmonize means to define common transaction set templates. This will enable all companies within the aerospace industry to use a common format amongst themselves. This applies to aerospace manufacturers as well as suppliers.

The upgrade from ANSI X12 version 2001 to 4010 caused many revisions to occur; driven from our efforts to comply with the AIA ECWG's harmonization committee. Revisions were made not only at the segment level but also at the element level, namely the use of element codes. The following matrix defines those revisions at the segment level only:

Header Section Level

Old Segment	New Segment	Data Type	Description of Change
REF	N9/MSG	Mask PO #	Reclassified to a different segment.
NTE	N9/MSG	Mask PO Note	Reclassified to a different segment.
PER09	None	Buyer Code and Buyer Mail-stop	Removed.
PER	N9/MSG	Supplier Contact	Reclassified to a different segment.
NTE	N9/MSG	Term Expiration Date	Reclassified to a different segment.
NTE	N9/MSG	Routing Type	Reclassified to a different segment.
NTE	N9/MSG	Routing Instructions	Reclassified to a different segment.
NTE	N9/MSG	PO Note Codes and Text	Reclassified to a different segment.
N1 loop	N1 only	Supplier Name & Address	Removed supplier address information (i.e. the N3 and N4 segments)

ANSI ASC X12 - 850 Transaction Set Mapping - cont'd

Detail Section level

Old Segment	New Segment	Data Type	Description of Change
(none)	CTP	No Charge pricing info	Added to CTP segment for clarity.
ITA	SAC	Special Charges	Reclassified to a different segment.
REF	N9/MSG	Supplier Banked Material: PO# and part number data	Reclassified to different segments.
REF	N9/MSG	Non-numeric prices (i.e. pricing codes)	Reclassified to different segments
REF	N9/MSG	Non-numeric schedule dates	Reclassified to different segments

The shaded areas titled **USER:** are for descriptive information for you, the user, regarding the reference segment or element, with the intent that it will better define the use or description of the data being sent.

ANSI ASC X12 - 855 Transaction Set Mapping

Introduction

This section displays the mapping requirements for the ANSI ASC X12, version 4010, 855 transaction set.

Boeing Commercial Airplanes Group is a member of the Aerospace Industry Association's (AIA) Electronic Commerce Working Group (ECWG). The AIA ECWG's purpose is to review the ANSI ASC X12 transaction sets used within the aerospace industry and harmonize them. To harmonize means to define common transaction set templates. This will enable all companies within the aerospace industry to use a common format amongst themselves. This applies to aerospace manufacturers as well as suppliers.

The upgrade from ANSI X12 version 2001 to 4010 caused many revisions to occur; driven from our efforts to comply with the AIA ECWG's harmonization committee. Revisions were made not only at the segment level but also at the element level, namely the use of element codes. The following matrix defines those revisions at the segment, element and code level. Many code values that were acceptable in X12 version 2001 will no longer be accepted by Boeing.

Element Summary:

<u>Ref</u>	<u>Id</u>	<u>Element Name</u>	<u>Req</u>	<u>Type</u>	<u>Min/Max</u>
SCH01	380	Quantity	M	R	1/15
		User: Schedule Quantity			
SCH02	355	Unit or Basis for Measurement Code	M	ID	2/2
		User: Line Item Unit of Measure			
		Please refer to Attachment A for Unit of Measure Codes List			
SCH05	374	Date/Time Qualifier	M	ID	3/3
		<u>Code</u> <u>Name</u>			
		038 Ship No Later			
SCH06	373	Date	M	DT	8/8
		User: Date expressed in CCYYMMDD format			

Summary Section

CTT: Transaction Totals

Pos: 010 Max: 1
Summary - Optional
Loop: CTT Elements: 2

To transmit a hash total for a specific element in the transaction set

Element Summary:

<u>Ref</u>	<u>Id</u>	<u>Element Name</u>	<u>Req</u>	<u>Type</u>	<u>Min/Max</u>
CTT01	354	Number of Line Items	M	N0	1/6
CTT02	347	Hash Total	O	R	1/10

Attachment A

Unit of Measure Codes List

The following code list represents the only codes that will be sent from the PCOS application via EDI.

Code	Name
03	Seconds
BD	Bundle
BF	Board Feet
BG	Bag
BM	Bolt
BO	Bottle
BR	Barrel
CA	Case
CF	Cubic Feet
CG	Card
CI	Cubic Inches
CL	Cylinder
CM	Centimeter
CN	Can
CT	Carton
CX	Coil
CY	Cubic Yard
DA	Days
DF	Dram
DH	Miles
DR	Drum
DZ	Dozen
EA	Each
FT	Foot
GA	Gallon
GR	Gram
GS	Gross
HA	Hank
HR	Hours
HU	Hundred
HV	Hundred Weight (Short)
IN	Inch
JA	Job
JR	Jar
KG	Kilogram
KT	Kit
LB	Pound
LF	Linear Foot
LN	Length

Code	Name
LO	Lot
LT	Liter
LY	Linear Yard
MJ	Minutes
ML	Milliliter
MM	Millimeter
OZ	Ounce
PA	Pail
PC	Piece
PD	Pad
PK	Package
PR	Pair
PT	Pint
QT	Quart
RL	Roll
RM	Ream
SC	Square Centimeter
SF	Square Foot
SH	Sheet
SI	Square Inch
SJ	Sack
SM	Square Meter
SO	Spool
SQ	Square
ST	Set
SY	Square Yard
TB	Tube
TG	Gross Ton
TH	Thousand
TO	Troy Ounce
TQ	Thousand Feet
UN	Unit
VI	Vial
ZP	Page
ZZ	Mutually Defined

Attachment B

Special Charge Codes

Code	Name
B110	Chemical Milling Charge
B670	Contract Escalation
B940	Cutting Charge
C090	Deposit Charges
C230	Die Service Charge
C690	Escalation
C870	Expediting Fee
C880	Expediting Premium
C930	Export Shipping Charge
D580	Heat Treat Charge
D900	Installation
E290	Layout/Design
E960	One-Time-Only Charge
F050	Other (See related description)
F150	Packaging Service
F650	Preparation
G400	Repair
G470	Restocking Charge
G510	Returnable Container
G660	Scrap Allowance
G760	Set-up
H000	Special Allowance
H980	Test/Qualification Charge
I110	Tooling
ZZZZ	Mutually Defined i.e.: Deceleration Charge
