USE OF GOV AUDITS
If Seller refuses Buyer access to audit Seller's books and records for the purpose of establishing a fair and reasonable price for this order and limits such audit to the U.S. Government, then Seller agrees that should the Government recommend different rates than those used by the Seller in its proposal, Seller will agree to use those rates during negotiations, or within 30 days Seller agrees to convince the government to revise its audit findings and recommendations and issue a revised audit report. Furthermore, Seller agrees to make available all information necessary for Buyer to perform a technical evaluation of Seller's price, including all material costs.
