605. Manufacturer Acceptance Test Reports (10/1/96). Seller will include with each shipment a copy of the results of the lot or item acceptance tests required by the applicable specification. The report will include the principal specifications, including revision numbers or letters, which govern the production of the item. Where quantitative limits are established by the specification, the report will indicate the actual values obtained during testing. Test reports will include the control identity (e.g. lot, heat lot, serial number) of the material or item tested. If Seller is not the manufacturer, Seller will furnish the manufacturer's test report as described above.
